ISM/ISPS Code Services

Complete Safety and Security Management System Solutions

The IMO publishes international standards applicable across the world, including the latest version of SOLAS. The International Safety Management Code (ISM Code) provides for the requirements for ensuring safe ships and clean seas. The ISPS Code addresses security of maritime assets. We offer the below services to assist you with these requirements.

Develop, update and improve your Management System to comply with the ISM Code

- ISM Doc/SMC/ISSC Certification
- Internal Audits
- Documentation Software Solutions
- Ship Security Assessments and Audits

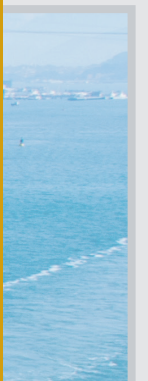

Courses:

- ISM Auditor
- Designated Person Ashore (DPA/DP)
- Senior Top Management
- Problem Solving, Corrective Action
- ISPS Auditor
- CSO, VSO/SSO, PFSO* - Company, ship and port facilities training requirements under the ISPS Code
- VPSSD

*approved by USCG and Liberian Ship Registry

With extensive Maritime expertise in house, we can provide any course or assistance to suit your individual / company requirements

Other Services

- Maritime Labour Convention 2006 (MLC) • Ballast Water Management Plan
